Study complex systems with reactive molecular dynamics. The ReaxFF module in the Amatador Modeling Suite also includes many advanced options, including pre/post-processing tools to refine force fields or build new ReaxFF parameter sets. Molecular dynamics modeling of lithium ion intercalation induced change in the mechanical properties of LiMnxO2, R. Tyagi and S. Sririvasan, JOURNAL OF CHEMICAL PHYSICS, 153, 164712 (2020). (DOI: 10.1063/5.0020823) abstract of contemporary investigation in the life sciences is devoted to the molecular-scale understanding of biological processes — in particular, dynamic alterations in the levels, modifications, and interactions of cellular effectors, including proteins. Frontiers in Molecular Biosciences offers an international public...
